Reference: Purchase Order OCC 711611-8 DPM 3482 Product #T251-C

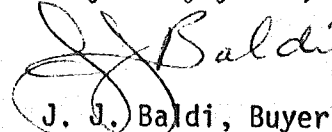

Dear Mr. McDonald:

In the latest drum shipment of T251-C Paint Stripper, to our DPM 3482 covered by Purchase Order OCC 711611-8, containers have been packaged unsatisfactorily in regards to safety.

Shortly after receipt of your material in drums, excessive pressure had built up and had to be vented, a hazardous task by two employees in full acid suits. Drums were distorted to the point that they would not stand on end. You replaced the bungs with alleged self venting bungs which did not relieve the pressure completely. In order to use the material the bungs had to be chiseled open which is a hazardous and time consuming job.

Please check the factory to see if this material can be put in better containers that will have proper venting and advise as soon as possible. If this condition cannot be corrected a change will have to be made.

Very truly yours,

  
J. J. Baldi, Buyer

**Warning**

**DANGER**

**POISON**

**OPEN CAP FULLY**

**CONTAINER MAY CONTAIN PRESSURE**

**Causes Burns**

**DANGER**

**POISON**

*Do not get on skin or in eyes or mouth. Avoid breathing vapor. Do not take internally. Store away from food and out of reach of children and domestic animals.*

**Container Handling, Storage and Re-Shipping Instructions**  
**Use White Label (Corrosive Liquid)**

Before moving container be sure closures are securely fastened. Keep out of sun and away from heat. Never use pressure to empty. Before removing closures, loosen slowly to relieve pressure. Wear goggles and gloves. In case of spillage flush with plenty of water. Completely drain container if returned.

**FIRST AID TREATMENT**

**Speed in Removing This Stripper from Skin Is of Primary Importance**

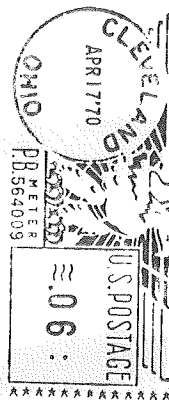

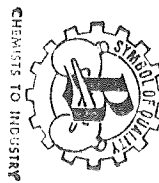

**IN CASE OF CONTACT**, immediately remove contaminated clothing and flood skin or eyes with large quantities of water. **CONTINUE WASHING FOR AT LEAST 15 MINUTES** or until all odor is gone. After washing, cover skin burns continuously with wet dressings such as, saturated solution of sodium thiosulfate. Do not use salves or ointments. Wash contaminated clothing before re-use.

**IF SWALLOWED**, administer without delay 1 1/2 oz. of castor oil, if available. Give large quantities of liquid (preferably warm salt water) and induce profuse vomiting immediately. Do not use emetic drugs.

**In All Cases, Get Immediate Medical Attention!**
